ABOUT TEKNIK HUB INDONESIA

PT. Teknik Hub Indonesia is a leading One-Stop Solution provider offering a comprehensive array of engineering services. Specializing in Electrical Mechanical, Construction Service, General Trading, and Suppliers, as well as Web Development, we deliver tailored solutions to address your specific requirements

Committed to Excellence: Providing High-Quality Solutions Across Industries

With a dedicated team of professionals and a commitment to excellence, we strive to deliver high-quality services and innovative solutions that drive success for our clients. From electrical maintenance and construction to hydraulic equipment supply and web development, Teknik Hub Indonesia is your trusted partner for all your engineering needs.

Our Services & Product

We provides tailored engineering solutions and products to meet our clients' specific needs. From Electrical Mechanical services to Construction, Trading, and Hydraulic Equipment, we offer comprehensive expertise and support for diverse engineering challenges, ensuring efficiency and innovation in every project.

ELECTRICAL MECHANICAL

With a focus on precision and efficiency, Teknik Hub Indonesia delivers top-notch Electrical Mechanical services. Our skilled professionals conduct thorough inspections, diagnose issues, and perform necessary repairs to optimize the performance of electrical and mechanical systems.

1

CONSTRUCTION SERVICES

We excel in Construction Services, offering comprehensive solutions for diverse infrastructure needs. From electrical substations to panel and transformer rooms, we provide end-to-end support, ensuring precise execution, strict quality standards, and prioritizing safety throughout.

GENERAL TRADING & SUPPLIES

General Trading and Supplies play a vital role, offering seamless procurement solutions for various industrial needs. We specialize in supplying electrical components and hydraulic equipment such as transformers, cubicle panels, and ATS panels. Our services also encompass installation, ensuring seamless integration into existing infrastructure.

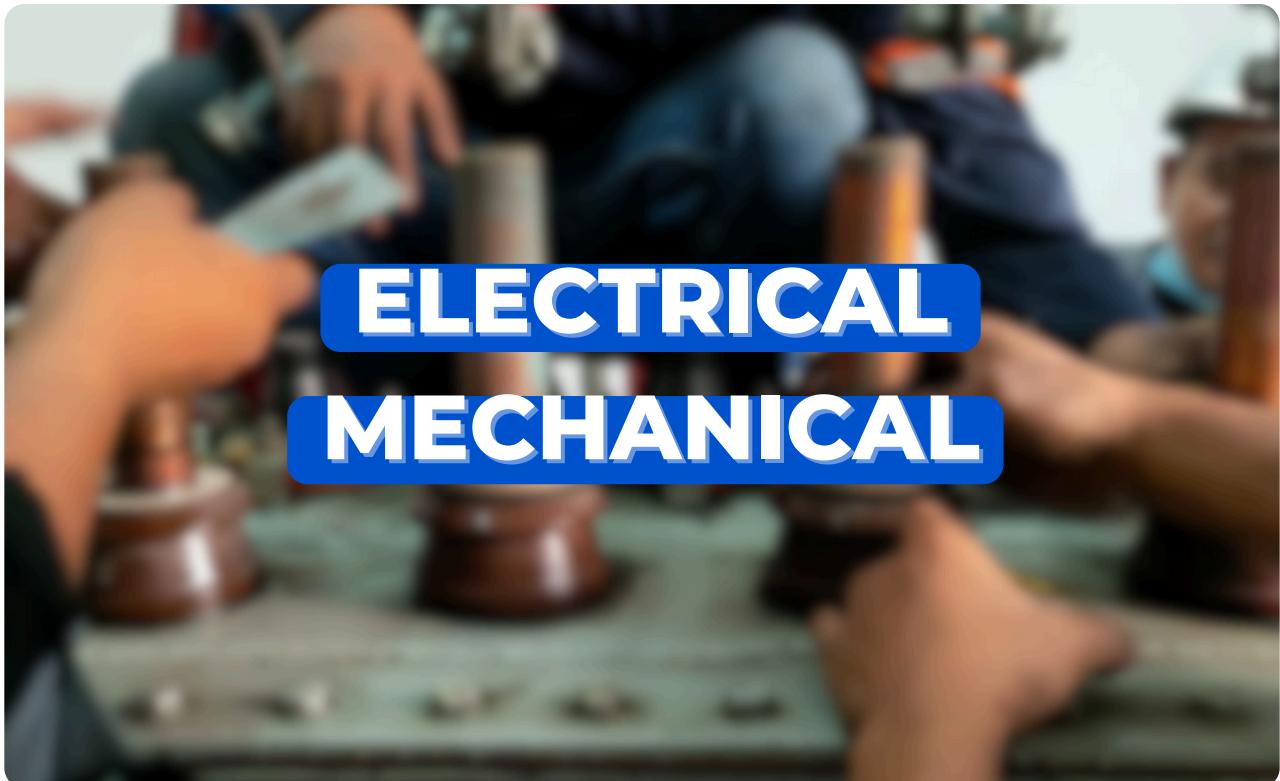

3

WEB DEVELOPMENT

Teknik Hub Indonesia specializes in both front-end and back-end development. We excel in creating dynamic and responsive websites tailored to our clients' needs. Whether it's designing user interfaces or building robust back-end systems, we are committed to delivering high-quality solutions that exceed client expectations.

ELECTRICAL MECHANICAL

With a focus on precision and efficiency, Teknik Hub Indonesia is committed to delivering top-notch Electrical Mechanical services. Our skilled professionals conduct thorough inspections, diagnose issues, and perform necessary repairs to optimize the performance of electrical and mechanical systems. Whether it's troubleshooting electrical faults or fine-tuning mechanical components, we strive to ensure the utmost satisfaction and operational excellence for our clients.

At Teknik Hub Indonesia, we understand the critical role that Electrical Mechanical services play in the smooth functioning of industrial operations. That's why we prioritize continuous improvement and innovation in our methodologies, staying abreast of the latest technological advancements to deliver cutting-edge solutions. With our unwavering dedication to quality and reliability, we stand as your trusted partner for all your Electrical Mechanical needs.

INFRARED THERMOGRAPHY

This is a non-destructive testing technique used to detect thermal abnormalities in electrical equipment, including transformers and electrical panels. It involves using an infrared camera to capture images of the equipment, which can then be analyzed to identify any hot spots or other issues.

Panel Cubicle Maintenance comprises routine tasks conducted on electrical panels to ensure functionality and prevent hazards. This includes cleaning, inspecting, and testing components to identify and address issues.

DGA AND BDV

TRANSFORMER OIL TEST

MECHANICAL AND ELECTRICAL SERVICE

These are tests performed on transformer oil to check for the presence of dissolved gases (DGA) and to measure the breakdown voltage (BDV) of the oil. These tests can help identify potential issues with the transformer and inform maintenance or repair decisions.

When a transformer fails or is damaged, it may need to be repaired to restore its function. Repair tasks may include replacing damaged components, re-winding coils, or repairing cooling system.

TRANSFORMER REPAIR

TRANSFORMER MAINTENANCE

Transformers are critical components of electrical systems, and regular maintenance is important to ensure their reliable operation. Maintenance tasks may include checking oil levels and quality, inspecting electrical connections, and cleaning/replacing cooling systems.

Electrical panel cubicles contain the switches, fuses, and other components that control the flow of electricity in a building or facility. Regular maintenance of these panels is important to ensure their proper function and prevent electrical hazards.

ATS PANEL MAINTENANCE

This refers to general maintenance tasks that are performed on electrical panels to ensure their proper function and prevent hazards. This may include cleaning or replacing components, checking electrical connections, and performing tests to identify any issues.

PANEL CUBICLE MAINTENANCE

An Automatic Transfer Switch (ATS) is a device that automatically switches a building's power source from the utility grid to a backup generator in the event of a power outage. Regular maintenance of this device is important to ensure its reliable operation when it is needed.

ELECTRICAL PANEL MAINTENANCE

CONSTRUCTION SERVICES

Teknik Hub Indonesia excels in Construction Services, offering a comprehensive suite of solutions to meet diverse infrastructure needs. From the construction of electrical substations to the development of panel rooms and transformer rooms, we provide end-to-end support, encompassing everything from initial design to final execution. Our dedicated team ensures that each project is completed with the utmost precision, adhering to stringent quality standards and prioritizing safety at every stage of the construction process.

- ● ELECTRICAL SUBSTATION CONSTRUCTION

This refers to the construction of rooms or buildings to house electrical panels and transformers. These rooms must be designed to provide proper ventilation, access, and safety features to protect the equipment and personnel working on or near it

This refers to the construction of electrical substations, which are facilities that transform high-voltage electricity from transmission lines to a lower voltage suitable for distribution to homes and businesses

- ● PANEL ROOM AND TRANSFORMER ROOM CONSTRUCTION

With a commitment to excellence and innovation, Teknik Hub Indonesia stands as a trusted partner for all construction endeavors. Our expertise lies in delivering reliable, high-quality construction solutions that cater to the unique requirements of each client. Whether it's building new infrastructure or renovating existing facilities, we are dedicated to exceeding expectations and delivering projects that stand the test of time.

General Trading & Supplies

General Trading and Supplies are integral to Teknik Hub Indonesia's services, providing seamless procurement solutions for diverse industrial needs. We specialize in supplying a wide range of electrical components and hydraulic equipment, including transformers, cubicle panels, ATS panels. Our services also include installation, ensuring smooth integration into existing infrastructure.

- ● TRANSFORMERS, CUBICLE PANELS, TM PANELS

Specializing in electrical solutions, we offer supply and installation services for Automatic Transfer Switch (ATS) panels, Air Circuit Breakers (ACBs), and Kilowatt Hour (KWH) meters. Our expertise ensures seamless power management and efficient energy monitoring for buildings and facilities.

Specializing in electrical solutions, we provide supply and installation services for transformers, electrical panel cubicles, and temporary meter panels. From voltage management to controlling electricity flow, we offer reliable and tailored solutions for diverse needs.

- ● ATS PANELS, ACBS (AIR CIRCUIT BREAKERS)
- ● KWH METERS

- ● POWER DISTRIBUTION PANELS (LVMDP, SDP, LP)

This refers to the supply and installation of various types of power distribution panels, including Low Voltage Main Distribution Panels (LVMDP), Sub-Distribution Panels (SDP), and Lighting Panels (LP). These panels help distribute power to various parts of a building or facility.

We are a trusted supplier of hydraulic equipment, offering quality products at competitive prices. From renowned brands like Graco, Absray, to Hyva, we provide reliable hydraulic solutions for various industrial needs.

- ● SUPPLIER INDUSTRY HYDRAULIC EQUIPMENT

Web development services Teknik Hub Indonesia offers expertise in both front-end and back-end development. We specialize in crafting dynamic and responsive websites tailored to our clients' needs. Whether it's designing user interfaces or building robust back-end systems, we are committed to delivering high-quality solutions that meet our clients' expectations.

FRONT-END

We offer front-end services including HTML, CSS, and JavaScript development, as well as UI and UX design to create engaging and functional websites for our clients.

Our back-end services encompass the development of server-side functionalities and databases to ensure seamless operations and data management for our clients' websites and applications. With expertise in languages such as Python, Java, and PHP, we tailor solutions to meet specific business requirements, integrating security measures and scalability for optimal performance.

BACK-END

Our Values

We are steadfast in upholding a set of core values that serve as the foundation for every step we take. These values guide us in delivering the best services to our clients and maintaining high standards of excellence in every aspect of our business. From the professionalism of our team to our commitment to customer satisfaction, each of our values is reflected in every interaction we have. With these values as our pillars, we are determined to continue providing unparalleled services, innovation, and customer satisfaction.

PROFESSIONAL TEAM

At Teknik Hub, professionalism is at the core of our values. Our team comprises dedicated professionals committed to delivering excellence in every aspect of our service.

BEST-IN-CLASS CUSTOMER SERVICE

Our commitment to providing the best customer service means prompt and responsive assistance at every step.

SERVICE AND PRODUCT GUARANTEE

We stand behind our services and products, offering a guarantee of quality and reliability.

INNOVATIVE PROBLEM SOLVING

We continuously innovate to tackle challenges creatively, offering cutting-edge solutions.

AFFORDABLE PRICING

We provide cost-effective solutions without compromising on quality, ensuring affordability for all.

CUSTOMER SATISFACTION PRIORITY

Customer satisfaction is our utmost priority, driving every decision and action we take.

98%

Clients satisfaction with our service and product

Our comprehensive facilities services include technical operational & maintenance.
